Abstract	ix
Contents	x
List of Tables	xiv
List of Figures	xv
1 Overview	1
1.1 Introduction	1
1.2 The central metaphor	3
1.3 Overview of things to come	6
2 The stage	8
2.1 Introduction	8
2.2 Notational conventions	8
2.3 Mereology	9
2.3.1 Foundations of algebraic semantics	9
2.3.2 Higher-order properties	18
2.3.3 Axiomatizations of classical mereology	19
2.3.4 Mereology versus set theory	21
2.4 Ontology	22
2.4.1 Ordinary objects (type e)	24
2.4.2 Kinds	25
2.4.3 Events (type v)	25
2.4.4 Intervals (type i)	27
2.4.5 Degrees (type d)	28
2.4.6 Numbers (type n)	30

2.5	Functions	31
2.5.1	Thematic roles (type $\langle ve \rangle$)	31
2.5.2	Trace functions: runtime and location (type $\langle vi \rangle$)	34
2.5.3	Measure functions (types $\langle ed \rangle$ and $\langle vd \rangle$)	35
2.5.4	Unit functions (types $\langle dn \rangle$ and $\langle in \rangle$)	36
2.5.5	The cardinality function (type $\langle en \rangle$)	39
2.6	Nouns	40
2.6.1	Singular count nouns	41
2.6.2	Plural count nouns	42
2.6.3	Measure nouns	45
2.6.4	Group nouns	46
2.6.5	Mass nouns	47
2.6.6	Kind-referring readings	48
2.7	Verbs	49
2.7.1	The Neo-Davidsonian position and its alternatives	49
2.7.2	Lexical cumulativity	50
2.8	Noun phrases	53
2.9	Prepositional phrases	57
2.10	The compositional process	57
3	The cast of characters	60
3.1	Introduction	60
3.2	Pseudopartitives	61
3.3	<i>For</i> -adverbials	64
3.4	Adverbial- <i>each</i> constructions	67
4	The theory	69
4.1	Introduction	69
4.2	What is distributivity?	70
4.2.1	Quantificational distributivity	70
4.2.2	Relational distributivity	70
4.2.3	Predicative distributivity	71
4.3	Distributive constructions	74
4.3.1	<i>For</i> -adverbials are distributive constructions	75
4.3.2	Pseudopartitives are distributive constructions	76
4.4	The components of a distributive relation	76
4.5	The constraints on distributive constructions	78
4.5.1	Adverbial <i>each</i>	81
4.5.2	Temporal <i>for</i> -adverbials	82
4.5.3	Pseudopartitives	85

4.6	Unifying the constraints	90
4.7	Compositional implementation	92
4.8	Summary	95
5	Minimal parts	99
5.1	Introduction	99
5.2	The minimal-parts problem	99
5.2.1	The minimal-parts problem for verbal predicates	100
5.2.2	The minimal-parts problem for mass nouns	101
5.3	Previous accounts of the minimal-parts problem	102
5.3.1	Dowty (1979)	102
5.3.2	Hinrichs (1985)	103
5.3.3	Moltmann (1989, 1991)	105
5.3.4	Link (1991)	108
5.3.5	Summing up	110
5.4	My take on the minimal-parts problem	110
5.4.1	Parallels between <i>for</i> -adverbials and frequency adverbs	111
5.4.2	Motivating stratified reference	113
5.4.3	Parallels between <i>for</i> -adverbials and pseudopartitives	119
5.5	Summary	121
6	Aspect and space	123
6.1	Introduction	123
6.2	Subregions versus strata	127
6.3	Implementations of both approaches	131
6.3.1	Dowty (1979) and my proposal	131
6.3.2	Krifka (1998)	133
6.4	Comparing the approaches	135
6.4.1	The subregion-based approach	137
6.4.2	The strata-based approach	141
6.5	Summary	143
7	Measure functions	145
7.1	Introduction	145
7.2	Intensive and extensive measure functions	145
7.3	Why <i>thirty degrees of water</i> is unacceptable	148
7.4	Generalizing to other distributive constructions	150
7.5	Comparison with previous work	153
7.6	Summary	157

8	Distributivity and scope	159
8.1	Introduction	159
8.2	Lexical and phrasal distributivity	161
8.3	Atomic and nonatomic distributivity	169
8.4	The scopal behavior of <i>for</i> -adverbials	176
8.5	Nonatomic distributivity in <i>for</i> -adverbials	181
8.6	Summary	185
9	<i>For, each, and all</i>	186
9.1	Introduction	186
9.2	<i>All</i> vs. <i>every/each</i>	186
9.2.1	Numerous-type predicates	188
9.2.2	Gather-type predicates	190
9.3	Similarities between <i>for</i> and <i>all</i>	192
9.3.1	<i>For</i> and <i>all</i> block cumulative readings	192
9.3.2	<i>For</i> and <i>all</i> license dependent plurals	194
9.4	Explaining the similarities between <i>for</i> and <i>all</i>	196
9.4.1	<i>For</i> and <i>all</i> block cumulative readings	197
9.4.2	<i>For</i> and <i>all</i> license dependent plurals	200
9.5	Explaining the behavior of <i>numerous</i> and <i>gather</i>	208
9.5.1	Collective predication	208
9.5.2	<i>All</i> distinguishes between <i>be numerous</i> and <i>gather</i>	212
9.5.3	<i>Gather</i> distinguishes between <i>each</i> and <i>all</i>	216
9.6	Winter (2001) on <i>all</i>	219
9.7	Summary	223
10	Conclusion	226
	Appendix	228
	Bibliography	231
