Restrictive \( \phi \): Giving Substance to the Pronoun/Agreement Cline

Pronoun > Clitic > Restrictive \( \phi \) > Agreement

- interpretable (like a pronoun), but does not saturate the argument position (like agreement)
- restricts the argument position (Predicate Restriction: Chung & Ladusaw 2004)

Under-Inheritance: Explaining Left-Edge A - A' Interactions

- Uneconomical: A-features of C transferred to T; DP(1) values T & raises; DP(1) values C & raises
- Economical: A-features of C not transferred to T; DP(1) values C & raises; [spec, T] unavailable

Subject-Initial V2:

Subject in CP and yet can pattern as an A-position

ACEHNESE PASSIVE

A Few Results of My Investigations into the Notion “Subject”
