1. Introduction	3	5.2. Equipment	36
1.1. The scope and goals of this work	3	5.3. Acoustic analysis of telephone interviews compared to face-to-face interviews	37
1.1.1. The separation of linguistics and dialect geography	4	5.4. Selection of tokens for analysis	37
1.1.2. The renewal of the connection	4	5.5. Selection of points of measurement	37
1.2. A brief history of American dialect geography	5	5.6. Format and content of vowel files	39
1.3. The design of the Atlas of North American English	7	5.7. Normalization	39
1.3.1. The Telsur design	8	5.8. Analyzing and displaying vowel systems with the Plotnik program	40
1.3.2. Technical developments	8		
1.3.3. Stages of research and sources of support	9		
1.4. Data to be presented and questions to be answered	9	6. The construction of isoglosses	41
1.5. Organization of the Atlas	10	6.1. Criteria for selection	41
		6.2. Drawing isoglosses	41
2. The North American English vowel system	11	6.3. Isogloss relations	43
2.1. Long and short vowels	11		
2.2. Unary vs. binary notation	11	7. The restoration of post-vocalic /r/	47
2.3. Initial position	12	The expansion of /r/ in the South	47
2.4. Description of the word classes	13		
2.5. Vowels before /r/	14	8. Nearly completed mergers	49
2.6. The linguistic status of the initial position	15	The merger of /ahr/ and /ɔhr/	52
3. Principles of chain shifting and mergers	16	9. North American mergers in progress	57
3.1. General principles of chain shifting	16	9.1. The low back merger	57
3.2. Long/short, tense/lax, peripheral/non-peripheral	16	Progress of the low back merger by region	61
3.3. Acoustic evidence for the Peripherality Hypothesis	17	9.2. Conditioned mergers	65
3.4. Movements across subsystems	18	Comparison of mergers before /l/	69
3.5. General principles of merger	19	Other mergers before /l/	72
4. Sampling and field methods	21	10. The vowels of North American English: Maps of natural breaks in F1 and F2	75
4.1. The pilot project	21	Introduction	75
4.2. Expansion of the project	21	Appendix 10.1. Summary statistics for Maps 10.1-10.38	114
4.3. Selection and recruitment of speakers	22		
4.3.1. National ancestry	23		
4.3.2. Race	24	11. The dialects of North American English	117
4.4. Methods of recruitment	24	11.0. Introduction	117
4.5. Records of calls required for successful interviews	25	Criteria for defining dialect regions	117
4.6. Contacting speakers: pinpointing the ideal speaker	27	11.1. The dialects of North American English	119
4.7. Age and gender distribution of the sample	27	The Inland North	119
4.8. The Telsur interview	28	The Mid-Atlantic States and New York City	122
4.9. The second interview	29	The South	123
4.10. Impressionistic coding	29	Characteristics of the major isoglosses	123
4.11. The socio-economic index	30	The Outer Limits of the South and the Southern Shift	123
Appendix 4.1. Zones of influence, central cities, and UA population	30	Dialects within the low back merger area	128
Appendix 4.2. Sample interview form	32	Eastern New England	128
Appendix 4.3. Sample word list	35	Defining the outer limits of the North	131
		Between the North and the South	131
5. Methods of acoustic analysis	36	The West	135
5.1. The philosophy of measurement involved	36	The larger Southeastern region	135

Eastern New England (Chapter 16.1)	135	Vowel system of Joanna R. from Detroit. Figure 14.21	208
Western New England (Chapter 14.2)	139	14.7. Summary of real-time evidence on the Northern Cities Shift	209
The Atlantic Provinces (Chapter 15)	139	14.8. The social parameters of the Northern Cities Shift	209
Transitional areas	139	14.9. Western New England	210
Differential behavior of /ow/ and /ʌ/	141	14.10. The origins of the Northern Cities Shift	212
11.2. North American dialects classified by the fronting of /uw/ and /ow/	141	15. Canada	214
11.3. Regions and dialects of North America	143	15.1. The English-speaking population of Canada	214
11.4. Principal components analysis of North American regions	144	15.2. General features of Canadian English	214
11.5. The hierarchical structure of North American dialects	145	15.3. Data for acoustic analysis	215
11.6. Relation to previous studies	147	15.4. Focus of this chapter	215
12. The fronting of back upgliding vowels	150	15.5. Mergers and the phonemic inventory of Canadian English	215
12.1. The fronting of /uw/	150	15.6. The geographic distribution of phonetic features of Canadian English	218
12.2. The fronting of /ow/	153	15.7. Raising of /æ/ before nasals and /g/	219
12.3. The fronting of /aw/	155	16. New England	223
Social and phonological constraints on /aw/	158	16.1. New England in earlier Atlas studies	223
12.4. Individual vowel systems	161	16.2. Vocalization of /r/	224
12.5. Overview	165	16.3. The low back merger in Eastern New England	226
13. The short-<i>a</i> and short-<i>o</i> configurations	167	16.4. The fronting of /ahr/ and /ah/	226
13.1. Short- <i>o</i> configurations	167	The fronting of /ah/	228
The realization of the short- <i>o</i> class	167	The east–west New England line	228
Representation of the merged classes	170	17. New York City and the Mid-Atlantic states	232
13.2. Short- <i>a</i> configurations	171	17.1. New York City	232
The split system	171	17.2. The Mid-Atlantic States	235
The broad- <i>a</i> system	172	Baltimore	237
The nasal system	172	An intermediate short- <i>a</i> system: Trenton and environs	237
The raised /æh/ system ⁷	173	18. The South	239
Northern breaking	175	18.1. Earlier studies of the South	239
Southern breaking and the Southern drawl	176	18.2. Relics of older Southern phonology	240
Continuous short- <i>a</i> systems	178	18.3. The Southern Shift	241
Differentiation of the voiced stops	178	Internal conditioning of the Southern Shift	252
The merger of /æg/ and /eyg/	179	18.4. The Back Upglide Shift	253
14. The North	185	18.5. Overall view of the South	255
14.1. The North as a whole	185	18.6. Southern Shift vowel systems	255
14.2. The Northern Cities Shift	185	18.7. The Charleston dialect	258
History of the Northern Cities Shift	188	18.8. The City of New Orleans dialect	259
14.3. Telsur subjects in the Inland North	189	18.9. Atlanta	260
14.4. Mapping the Northern Cities Shift	189	18.10. Settlement history of the Inland South	260
The Northern Cities Shift patterns in the Natural Break maps of Chapter 10	189	19. The Midland	262
The raising and fronting of /æ/	190	19.1 Geographic distribution of Midland features	262
The fronting of /o/	193	Glide deletion in the Midland	265
The lowering and fronting of /oh/	195	The fronting of /ʌ/ in the Midland	265
The lowering and backing of /e/	195	19.2. The Midland vowel systems: Columbus and Kansas City	265
Canadian raising in the North	203	19.3. Pittsburgh	270
The North/Midland isogloss bundle	203	The low back merger in Pittsburgh	270
14.5. The city of Erie	203	The Pittsburgh chain shift	270
14.6. Vowel systems of Inland North speakers	206	19.4. Cincinnati	274
The vowel system of James W. from Chicago: Figure 14.16	206	19.5. St. Louis	275
The vowel system of Steve A. from ann arbor: Figure 14.17	206	20. The West	278
The vowel system of Martha F. from Kenosha: Figure 14.18	207	20.1. The definition of the West	278
The vowel system of Sharon K. from Rochester: Figure 14.19	207		
The vowel system of Libby R. from Detroit: Figure 14.20	208		

The fronting of /ow/ in the West	278
/aw/ in the West	278
Southern features in the West	278
The DARE subdivisions of the West	283
20.2. The position of the West among North American dialects	283
20.3. The merger of vowels before /l/	284
21. Lexical and Grammatical Maps	289
21.1. Terms for 'carbonated beverage'	289
21.2. /u/ and /uw/ in <i>roof</i>	291
21.3. The geographical distribution of positive <i>anymore</i>	293
21.4. <i>needs</i> with the <i>-ed</i> participle	293
22. African-Americans	297
22.1. Ongoing mergers in the African-American community	297
22.2. Acoustic analysis of African-American speech	299
22.3. Comparison with rural and small town African-American speakers	301
23. The findings of the Atlas of North American English: An overview	303
How successful is the ANAE sampling method?	303
The definition of dialects on the basis of sound changes in progress	303
The major new findings of ANAE	303
Directions of change in progress	304
Unexpected findings and unsolved problems	304
